India's Most Trusted
Wooden Packaging Solution Provider

Products

- Wooden Cable Drums
- Plywood Reels
- Pinewood Export Drums
- Wooden Pallets
- Timber/Pinewood Laggings
- Hybrid Cable Drums
- EPE/EVA Foam Sheets
- Nuts/Bolts/Rods for Cable Drums

Products

India's Most Trusted wooden Packing Solution Provider

Wooden Cable Drums

Usage

Suitable for Packing of:

- Cables & Conductors
- Wires
- Pipes & Tubes

Wooden Cable Drums manufactured at our factories adheres to strict quality standards & specifications. Our quality has been trusted since 1985.

Product Sizes/Specifications

Wooden cable drums are available in various sizes as per requirements, available up-to 2800 mm. We ensure you get the right size & specifications with the quality you opt for.

Options: Available as a Kit for Assembly on-site. Stencilled or Painted for Identification.

Plywood Reels

Usage

Suitable for Packing of:

- Cables
- Wires
- FRP Rods
- UV
- Fabric & Cords
- Plastic Tubing

Plywood is a cheap alternative raw material for cable drums. Get the best quality plywood reels with competitive pricing. Contact us with your specifications.

Product Specifications/Sizes

Plywood Reels are available in varied sizes upto 1500 mm flange diameter.

Pinewood Export Drums

Usage

Pinewood Drums are suitable for:

- Cables
- Wires Packing

Pinewood export drums are manufactured using best quality pinewood & latest woodworking machinery.

Product Specifications/Sizes

Pinewood cable drums are manufactured using selected species of pine, pinewood sizes used are sawn and sanded using latest woodworking & saw milling machines. Sizes are available as per client's requirement. Please fill the form given below for your custom requirements & we will be happy to serve you.

Wooden Pallets

Usage

ISPM treated pallets are used for export packaging /handling.

We provide both export & domestic pallets.

ISMP 15 is an international standard for wood treatment. Our wooden pallets are manufactured with wood treated according to the standards & shipped globally.

Product Size/Specifications

International Standards For Phytosanitary Measures No. 15 (ISPM 15), standard developed by international body is required by importers in various countries. The treatment process directly addresses the need to treat wood materials of a thickness greater than 6mm, used to ship products between countries.

Please provide dimension & load bearing capacity requirement to get the best quotes.

Timber & Pinewood Lagging Sizes

Lagging Sizes for Wooden Cable Drums are available made from Hardwood Timber or Pinewood as per requirements.

Product Quality & Specifications

We at Arun Group are committed to Quality & Trust. The Timber Sizes we provide are cater to exact requirements requested by our clients. You can opt for Pinewood or Hardwood Timber as raw materials. Sizes are as per requirements.

Wooden Crates & Boxes

Wooden Crates & Boxes are available for various packaging, handling applications.

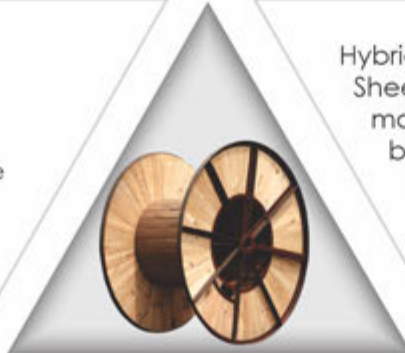

Product Dimensions/Specifications

Boxes & Crates manufactured from Hardwood Timber, Pinewoods are available in various dimensions as per required by customers. We can also provide heat treated timber Crates & Boxes upon request.

Hybrid Drums

FEATURES:

- Light Weight
- Easy to Assemble
- 100 percent Recyclable
- Requires Less Space
- Provide Greater Protection to Cables
- Economical & Reliable
- Environment Friendly

Hybrid Drums are manufactured using Steel Frames + HDPE Sheets or Steel Frames + Wooden Planks. We manufactures both type of Hybrid Drum. They are used by Telecommunication Power Cable & Overhead Conductors Manufacturers for transportation of Cables and Conductors. We produced Hybrid Drums ranging from 1000mm to 2200 mm in Diameter. Customized Sizes are also available upon request.

EPE/EVA Foam Sheets

EPE/EVA foam sheets are used as a packaging material, insulation & in sports equipment. It is widely used due to its special properties such as shock absorption, flexibility, thermal insulation, and water resistance.

Thermal Properties

EPE foam has better thermal properties than EVA. Typical values for thermal conductivity range from 0.01-0.02 BTU/hr-ft²F for EPE foam, and 0.25-0.29 BTU/hr-ft²F for EVA. EPE's low thermal conductivity gives it excellent heat resistance, making it a good insulating material for walls, ceilings and roofs. Its effective service temperature ranges from -58°-158°F. For temperatures exceeding this, EVA foam becomes a better alternative up to around 176°F.

Uses and Applications

Used within inner side of Cable Reels for protection & safety of cables.
